## MEET THE FILMMAKERS:

**Randy Mead** is a musician, producer, and film maker who is deeply involved with the healing properties of vibration. He wrote his Master's thesis on "Tuning and Psycho-Acoustics," which launched him on this lifetime quest. He has worked with a number of modalities as synergistic complements to sound healing, and his newest CD incorporates scalar waves with the audio program for a multi-dimensional healing experience.

Randy has been the flutist in the harp and flute duo of Michael & Mead for the last 35 years. Composers, arrangers, producers and international performers, they have recorded for various labels such as Nippon Phonogram (Japan,), Narada and David's own Purnima label. They have also lent their talents to numerous film scores.

The duo helped to pioneer World Fusion music, which combines musical ideas from many cultures. Michael & Mead have played in myriad eclectic ensembles through the decades and have collaborated with members of major symphonies and ethnic music masters from many countries.

**Hope Mead** is an artist who expresses herself in a variety of forms. She is a professional photographer, filmmaker, songwriter, healing arts practitioner and mother.

While studying photography at California Institute of the Arts in her early twenties, Hope traveled to a village in Liberia, West Africa with her Shamanism professor. It was there she had her mind expanded not only culturally by living in a polygamous society, but also through contracting malaria and having a near death experience.

In the Fall of 1973, two months after returning from West Africa, Hope was introduced to Dr. John Lilly and began experimenting with his isolation tanks (sensory deprivation tanks). The first time she floated in the dark tank, she returned to the same place she had discovered in her near death experience and was validated at a deep level about something she had known since childhood—we are aware of a very limited reality and we live side-by-side with other dimensions that are always available to us.

Hope is delighted that she can now share these other dimensions through her photography and the Orb experience.

For more information about Randy and Hope Mead, visit their website at [www.toolsfortranscendence.com](http://www.toolsfortranscendence.com)

**Seth Mead** is a filmmaker, screenwriter, musician, and producer who entertains and informs through various forms of media. It is his firm belief that people are most susceptible to change if they are being entertained. It was for this purpose that he co-created Merkabah Productions.

Seth's goal has been to synthesize the logical with the intangible and the scientific with the spiritual. Through his work, he fosters understanding and discussion on the important questions of our time.
